DIAMOND LATTICE WINDOW PANEL

\$880

c. 1900 • Shandong, China • Pine • Collection #TLA018C

W: 45.0" D: 1.25" H: 37.75"

This early 20th century lattice window panel likely originated in a northern Chinese home with neutral and balanced interiors. The geometric lattice pattern is linear and open, and was designed to allow light and air into a room while maintaining privacy. Assembled by carefully joining long strips of carved wood, this lattice window has an even, squared pattern that reveals a large diamond formation. Crafted of pine wood, this vintage lattice panel has a fantastic raw texture and still bears traces of the original painted finish.
