GEOMETRIC LATTICE PANEL

\$980

c. 1900 • Northern China, China • Northern Elmwood • Collection #DOOR004

W: 18.0" D: 1.0" H: 47.5"

Elegant in its simplicity, this 19th-century lattice window panel was designed to allow light and air into a room while providing a degree of privacy. Distinct from carving or perforating wood, the art of making lattice was an exacting craft. Requiring expert woodworking skills, the screen was created by precisely interlocking long and short pieces of carved elmwood. With its clean, crossed lattice design, the panel brings room-defining geometry to a modern context.
