"TREE JADE" PETRIFIED WOOD SPECIMEN

\$1,980

Northern China, China • Petrified Wood • Collection #PFW001

W: 26.0" D: 7.0" H: 7.0"

Like scholars' rocks, petrified, or fossilized, wood is millions of years old and appreciated for its natural beauty. Sometimes called "Tree Jade," petrified wood is thought to bring peace and prosperity to its surroundings. Each log has its own unique patterns of fossilized moss, bark, and the scars of a lifetime. These facets bring to mind a fascinating combination of organic mortality and preserved permanence. We keep them in their raw, unworked state, using the logs in fire places, as landscapes for succulents, or as natural patio seating.
